

Making it easier to safely exit
a dangerous rescue situation

AeroScape™

LION ESCAPE BELTS & HARNESSSES BY CMC

Escape Belt

The ergonomic LION-CMC Escape Belt allows for easy adjustability and proper positioning on the body along with convenient attachment to a personal rescue system. A user-friendly design allows fastening with a gloved hand over the turnout pant waist.

Features/Benefits:

- ▶ Stationary and sliding D-ring
- ▶ Durable FR para aramid webbing
- ▶ Fly/belt loop system integration for easy closure
- ▶ Elastic keepers to hold excess webbing

Certified to meet NFPA 1983 as an escape belt and as a ladder belt when used with an optional ladder tether (not included).

Class II Harnesses

LION Class II Integrated Harnesses are comfortable, lightweight and easy to adjust. Sitting high on the waist, the harness belt is positioned with the best center of gravity and allows easy access to the waist adjustment. A series of custom belt loops capture the belt and closure hardware for quick, one motion donning with the pant fly.

LION's innovative design situates the leg loops internally between the outer shell and thermal liner, protecting them from snag hazards, while allowing for outside-the-pant adjustment. Stationary and sliding D-ring options provide simple and convenient connection to your personal rescue system.

Features/Benefits:

- ▶ Durable FR para-aramid webbing
- ▶ Waist and loop leg adjusters
- ▶ Stationary and sliding D-ring
- ▶ Fly/belt loop system integration for easy closure

The LION Integrated Class II Rescue Harness is designated and certified as an NFPA 1983, Class II Life Safety Harness and meets the requirements of NFPA 1971.
