

ATTACK™

Digital Nozzle & Weighted Hose Line

REALISTIC HOSE LINE TRAINING ANYWHERE

Combine the ATTACK™ Digital Nozzle and Weighted Hose Line with the ATTACK Digital Fire Training System to train on the fundamentals like hand line advancement or basic fire attack — all without taking an engine out of service or compromising your training location.

REALISTIC TRAINING WITHOUT FLOWING WATER

ATTACK™ Digital Nozzle and Weighted Hose Line features self-generating digital infrared flames that allow firefighters to train where the use of flowing water isn't possible or practical.

REALISTIC

The Digital Nozzle is made with actual TFT automatic nozzles — so it feels like a real hose. Together, the Digital Nozzle and Weighted Hose Line deliver a realistic experience.

PROPER TECHNIQUE

When using the digital nozzle while the ATTACK is in laser mode, the fire will only be extinguished if the trainee uses proper hose line technique.

REAL-TIME FEEDBACK

Firefighters will get the feedback consistent with what you would expect when extinguishing a live fire.

COOPERATIVE TRAINING

The Weighted Hose Line has the same weight and feel of a fully charged line to allow trainees to practice hose line management. Trainees are forced to work together to maneuver through the training ground.

EASY TO USE

With the ATTACK Digital Nozzle and Weighted Hose Line, execute rapid evolutions on the fundamentals with minimal setup time, no clean up time, and no flowing water.

Bravery gets you through the door.
Training gets you and everyone else out."

LION[®]
ready for action

EXTINGUISH FIRES WITH PROPER HOSE LINE TECHNIQUE

With ATTACK™ Digital Nozzle and Weighted Hose Line, train on hose line advancement without taking an engine out of service.

See the chart on the final page for detailed component descriptions and specifications.

INCLUDED EQUIPMENT

- A. ATTACK Digital Nozzle
- B. Weighted Hose Line
- C. Battery Charger

AVAILABLE ADD-ONS

- D. ATTACK Digital Nozzle Transport Case
- E. Air Compressor with Accessories
- F. Air Chuck Assembly

NOTE: Product availability and design may differ based on market location.

EXTEND YOUR TRAINING ARSENAL

With the ATTACK™ Digital Fire Training System and other compatible fire safety training tools by LION, you can create safe, realistic training simulations where live-fire isn't possible. Mix and match simulation components for immersive training tailored to the needs of your students.

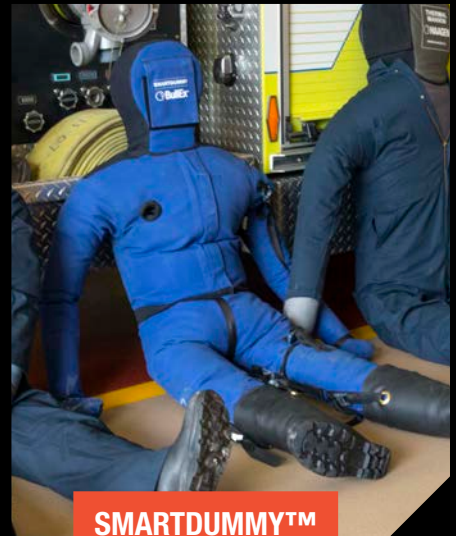

ATTACK™ DIGITAL FIRE TRAINING PANEL

SG4000™ SMOKE GENERATOR

ATTACK™ DIGITAL NOZZLE & 50' WEIGHTED HOSE LINE

SMARTDUMMY™

ATTACK™ DIGITAL FIRE TRAINING PANEL

Digital flames grow and spread realistically from the seat of the fire and respond dynamically to each student's technique via integrated hose line detection sensors.

SG4000™ SMOKE GENERATOR

Connect wirelessly and adjust settings manually or enable automatic smoke production tied to the size of the fire for added realism.

ATTACK™ DIGITAL NOZZLE & 50' WEIGHTED HOSE LINE

Laser-equipped nozzle interacts with digital flame panels for hose line training without the need for flowing water.

SMARTDUMMY™ RESCUE

Add hands-on rescue experience to any training scenario with a realistic and durable training manikin.

SPECIFICATIONS

BASE PACKAGE – INCLUDED EQUIPMENT

	<p>ATTACK Digital Nozzle V2</p>	<p>The ATTACK Digital Nozzle is constructed from TFT™ 1 ¾ inch (4.4 cm) automatic nozzle and equipped with infrared signal with green laser, speaker simulating hose line discharge, and On/Off adjustable bail positions.</p>	<p>Power: Rechargeable, internal NiMH 160mAh, 7.2 volt battery Battery Charger: 100-240V 50/60Hz 0.6A Input, DC 12V 1.25A Output Warranty: 1 year</p>
	<p>Weighted Hose Line</p>	<p>The Weighted Hose Line has the same weight and feel of a fully charged line to allow trainees to practice hose line management. Hose can be pressurized with air compressor or SCBA using optional regulator/adaptor.</p>	<p>Length: 50 ft. lengths of 1 ¾ inch NHT couplings (15.2 metre lengths of 4.4 cm hose) Weight: 50 lbs. (22.7 kg) Warranty: 1 year</p>

AVAILABLE ADD-ONS

	<p>ATTACK™ Digital Nozzle Transport Case</p>	<p>Durable transport case designed to hold ATTACK™ Digital Nozzle and accessories.</p>	<p>Warranty: 1 year</p>
	<p>Air Compressor with Accessories</p>	<p>Six-gallon air compressor with a maximum of 150 PSI; ships with premium air hose and brass fitting kit.</p>	<p>Warranty: 1 year</p>
	<p>Air Chuck Assembly</p>	<p>Air chuck assembly used to fill the weighted hose line with air from compressor.</p>	<p>Warranty: 1 year</p>

YOUR SAFETY IS OUR BUSINESS

For more than a century, LION has prioritized R&D and extensive engagement with fire departments and safety professionals to develop products, services and trainings that best serve their needs.
